

Claims

1. Animal food additive for economically useful animals which are pregnant, lactating, being fattened or raised, with a fraction of crude fibers, characterized in that it contains a crude  
5 fiber concentrate of fibrillated lignocellulose.
2. Animal food additive according to Claim 1, characterized in that the crude fiber concentrate has a water retention capacity of over 700%.
3. Animal food additive according to Claim 1 or 2, characterized in that the crude fiber concentrate has a very high swelling rate.
- 10 4. Animal food additive according to one of Claims 1 to 3, characterized in that the crude fiber concentrate has a crude fiber content (according to Weender analysis) of over 60%.
5. Animal food additive according to one of Claims 1 to 4, characterized in that it is compacted.
- 15 6. Animal food for economically useful animals which are pregnant or are being raised, with the animal food containing an additive of crude fibers, characterized in that the additive contains a crude fiber concentrate of fibrillated lignocellulose.
7. Animal food according to Claim 6, characterized in that it contains an animal food additive according to one of Claims 1 to 5.
8. Animal food according to Claim 6 or 7, characterized in that the additive is present in a  
20 quantity of 0.5-8.0% of the animal food.
9. Animal food according to one of Claims 6 to 8, characterized in that it is pelleted.
